

Linque's AI-Enabled Verification validates process integrity in real time, verifying SOP steps while ensuring audit readiness and operational excellence.

- Reduce costly manual errors with real-time verification and compliance checks
- Speed onboarding and increase repeatability
- Maintain audit readiness with traceability for both manual and automated steps
- Adapt quickly to evolving SOPs, platforms, and procedures
- Integrate seamlessly across IT, OT, automation, and legacy systems

Stronger compliance, fewer errors,
and faster operations

LI NQUE

INDUSTRIAL INTELLIGENCE

Whether performing steps on a single unit operation or validating production tasks across multiple sites, Linque automates compliance. Every step is checked in real time and logged. Creating a secure, audit-ready record including visual inspections, manual, and system data that reduces rework and accelerates throughput.

Compliance Without Compromise

Localized edge AI ensures instant checks with no dependency on cloud latency.

Every action logged in immutable, timestamped records for audit readiness.

Automatically scales from a single process to multi-site global operations.

Request a demo or contact us to learn how it can strengthen your operations.
